

Some of our products have strict imprint color restrictions. For our FSSLFB, WL-FSFB, FSSLBB & WL-FSBB we recommend only WHITE, SILVER, GOLD, YELLOW, BABY BLUE & PINK imprints. Dark imprint colors do not show up well on these products.

Full Size Synthetic Leather Footballs and Basketballs

Dark imprints do not show up on these products and are very hard to read.

White imprint VS. Black imprint comparison.

Even very large text imprinted in a dark color is nearly impossible to read from a reasonable distance.

The only exception to this rule is when a lighter color ink borders and lays under darker colors. Please see the 2 examples below. This exception is entirely based on the design and layout of the imprint and may not always work. Send files in question to artdept@galaxyballoon.com for review.
